

2022

Factors influencing lead, mercury and other trace element exposure in birds from metal mining areas

Identification of a novel Myxoma C7-like host range factor that enabled a species leap from rabbits to hares

Determination of glyphosate exposure in the Iberian hare: a potential focal species associated to agrosystems

2021

Integrating active and passive monitoring to assess sublethal effects and mortality from lead poisoning in birds of prey.

Trace element bioaccumulation in hypersaline ecosystems and implications of a global invasión

Iberian hares with anciently introgressed mitochondrial DNA express a marginal environmental niche

A multidisciplinary approach to the evaluation of the effects of foraging on landfills on white stork nestlings

Seasonality of *Coxiella burnetii* among Wild Rabbits (*Oryctolagus cuniculus*) and the *Hyalomma lusitanicum* (Acari: Ixodidae) in a Meso-Mediterranean Ecosystem

Efectos de la gestión agraria en parámetros reproductivos de la liebre ibérica
Artículo de divulgación derivado del proyecto CONLIEBRE SBPLY/17/180501/000514

¿Pueden afectar los fitosanitarios al éxito de enfermedades emergentes?
Artículo de divulgación derivado del proyecto REGULA I-FEDEXCAZA202013
